

CHRISTMAS TREE HILL WILDFIRE EVACUATION ZONE

Source: <https://www.marincounty.org/depts/fr/divisions/operations/wildfire-evacuation-zones>

CTH has many steps, lanes and pathways (SL&P) – we strongly advise you to find the SL&P nearest to your home on the map and to explore them in the event that you should ever need to evacuate on foot. CTH NRG is working on a report of the conditions that the SL&P are in for submission to the Fire Department and the Town of Corte Madera.

Message from the Central Marin Fire Chief, Ruben Martin, in response to an inquiry about when CTH can expect to have a real-time evacuation map available – a project that has been pending for many years:

“The evacuation map project was reimagined and a new electronic platform called Zone Haven will be used for evacuation mapping This platform actually uses real time data vs a PDF map that will not be effective during a real time evacuation. The platform was used successfully in Santa Cruz and in Napa during the lightning storm last year. **The platform is scheduled to go live this summer.** Here is the link to their page:
